

To: Departments Owning University Vehicles

From: Diana Moreno, Assistant Director, Parking and Transportation
Michael Aramian, Accounting Manager, Financial Services – Property Management

Subject: Annual Vehicle Information Survey

Financial Services Property Management, in collaboration with Parking and Transportation Motor Pool, will be conducting the consolidated **Annual Vehicle Information Survey** for Fiscal Year 2025.

The survey will be available on Motor Pool's [Fleet Data System](#) from September 1, 2024 through September 30, 2024.

Garage/Motor Pool and Property Management collect data annually on street legal vehicles that are owned by or entrusted to the University. This information is required by Arizona Department of Administration/Arizona Department of Transportation and is used to calculate the vehicle insurance premium allocation.

Fleet Data Report (Garage/Motor Pool)

- The Arizona Department of Transportation has requested the Vehicle Identification Number (VIN), repair costs, fueling costs, etc.
- Repair and fueling costs associated with services obtained from the Garage/Motor Pool will populate the Fleet Data Report. *Departments should first reconcile these figures to their records, adding any external fuel and repair costs if necessary.*
- Reported figures should cover all expenses for period September 1, 2023 through August 31, 2024.
- Data fields may be empty if the VIN does not match the database or if the vehicle is new.

Vehicle Insurance Report (Property Management)

- State Risk Management only assesses insurance on street legal vehicles. All eligible vehicles, functioning or not, must be insured. This includes all Non-Decommissioned United States Department of Agriculture (USDA) vehicles, designated with 'G-Tags'.
- The University's Vehicle Insurance Premium is allocated among all departments with vehicles in service as of July 1, 2024. The estimated Per Vehicle Insurance Premium for Fiscal Year 2025 is \$510.00. Charges will be billed to the listed account(s) based on the final, verified vehicle count by December 2024.
- Insurance Account information will be populated into the corresponding fields for all vehicles that were part of the prior year allocation. Please verify this information to ensure accuracy. For vehicles acquired during Fiscal Year 2024, the insurance Account field will be empty, and must be therefore populated.
- Sub-Accounts and Project Codes fields are optional but should be verified if containing information.
- If the Annual Vehicle Information Survey is not submitted by October 1, 2024, it will be assumed that the information on records is accurate, and insurance will be allocated accordingly. For records with no account, the department's default account will be used.
