Renderings of the new Bioscience Research Labs (BSRL) Interaction Space
UPCOMING ACTIVITIES

- Southwest Gas is on schedule to complete construction in Cherry Ave. in mid-December.

- **On December 15th**, DPR Construction will mobilize and set up office trailers, staging areas and temporary facilities across the street from the project.

- A project timeline and impact map will be provided in next week’s newsletter.

BSRL FUN FACTS

~ The BSRL main lobby will house a Starbucks Cafe ~

Meet Lorna Gray – BSRL Project
Facilities Project Manager, UA Planning, Design & Construction

Lorna has been with the department of Planning, Design & Construction since 2012. She is an enthusiastic team leader and has managed many successful projects - large and small, on the UA campus. She is excited to be guiding the DPR Construction Group through the building process of BSRL project.

“It is truly a privilege to have the opportunity to work on the BSRL Project. It is going to be a beautiful building. And it’s truly inspiring to think that we are building the home to future discoveries that could be beyond our current imaginings.”

Southwest Gas is finishing the underground piping connections before closing the trench in Cherry Ave.
